

Solutions For City-Wide Surveillance

In an effort to **reduce crime and increase the awareness of community safety**, local governments have been employing the use of surveillance networks. These networks have been proven to reduce crimes as much as 50% in some areas. However, installing a few cameras and monitors is not a substitute for a well planned and implemented surveillance network. A properly designed surveillance network, incorporated with other integrated systems, and training, will provide the support your police department needs to assist in community safety.

CSi can help you develop a surveillance plan that fits your policies, needs, and budget while leveraging your existing security assets and infrastructure including:

- Surveillance
- Private Secure Networks
- System Design
- Integration with Existing Assets
- Project Management
- Installation
- User Training
- Ongoing Support
